Financial Market Terminals

## **IS.Slider Now Available On BT Radianz Network**

**Terminal solution by IS.Teledata offers financial market data worldwide and comprehensive analysis functionality**

**Frankfurt, September 19, 2005** – IS.Slider, the financial market terminal of IS.Teledata, is now available on the BT Radianz network. Europe's largest provider and operator of customisable financial market information systems offers its web-based terminal solution not only over the Internet or via leased line, but also via the financial extranet of BT Radianz. Customers and prospects of IS.Slider who are already connected to the network thus benefit from more flexible, yet secure connectivity to IS.Slider.

The IS.TerminalSolution IS.Slider is a Financial Desktop for professional users in financial institutions. It offers comprehensive, global financial data, news and quotes, including far-reaching histories, analysis functions, screening tools for stocks, derivatives, bonds, funds and news as well as easy market overviews and reports. Internal contents can be integrated seamlessly into the terminal solution, and contained information exports conveniently into suitable formats. Navigation can be adapted to suit individual user preferences. Data costs can be invoiced per user. IS.Slider has been used employed in seven European countries for two years. The Financial Desktop is available in Basic and Advisor editions.

David Stopforth, Sales Director, Europe, at BT Radianz, said: "Our shared market infrastructure approach is gathering momentum in Europe and the addition of IS.Teledata reaffirms our growing position in this region."

Jens Quadbeck, Director, Marketing & Product Management at IS.Teledata, points out: "BT Radianz appealed to us because of its financial services focus and its global reach. Moreover, many of our customers, as well as prospects, already use BT Radianz, which makes its shared market infrastructure a perfect solution for us to reach our customers and expand our client base."
