

## PRESS RELEASE

IS.Professional Solutions

### **IS.Slider Replaces IS.MarketPilot**

#### **Customers receive cost-effective migration offer**

**Frankfurt, February 1, 2005** – IS.Teledata AG will completely replace its product IS.MarketPilot with the financial desktop IS.Slider by the end of 2005. The terminal solution IS.Slider offers more financial data, more possibilities to customise the display of market information and more functionality when exporting data to other applications. Banks and asset managers currently working with IS.MarketPilot will be able to migrate cost-effectively to IS.Slider. Until the end of 2005, they can subscribe to the basic version of IS.Slider for a price comparable to the fee for IS.Market Pilot. IS.Teledata will contact the users of IS.MarketPilot during the next weeks to give them comprehensive information about the conditions and technical requirements of the migration.

IS.Slider is the financial desktop of IS.Teledata AG for the off-trading floor, commercial banking, retail banking and asset management for affluent clients. The terminal solution can be enhanced according to customer needs. Among other functions, it is possible to integrate real-time quotes, interactive charts, rankings and ratings, news feeds as well as external and internal research information. In addition to providing and integrating market data from different sources, IS.Slider offers enhancements such as the interactive analysis of bonds, certificates, portfolios and risks. With IS.Slider financial advisors can deploy client-specific market information and analysis in order to develop ideal portfolio strategies.

The replacement of IS.MarketPilot through IS.Slider is the next step in consolidating the product portfolio of IS.Teledata following the merger of IS Innovative Software AG and OnVista Technologies GmbH in 2003.
