

INTERACTIVE DATA'S PRIMETERMINAL PROFESSIONAL EDITION FEATURES EXPANDED FUND INFORMATION

**Broadens Range of Available Data to Include Original Prospectuses for
Approximately 20,000 Funds**

Frankfurt, Germany, August 26, 2008 – Interactive Data Corporation (NYSE: IDC), a leading provider of financial market data, analytics and related services, today announced that its Managed Solutions group has enhanced PrimeTerminal Professional Edition, the Company's financial market terminal, by adding access to original fund prospectuses as an optional service for more than 20,000 funds from various European markets.

As a result of Interactive Data's collaboration with Austrian funds data supplier software-systems.at Börsensoftware und Datenbankservice GmbH and Italian funds data supplier Blue Financial Communication Srl, users of PrimeTerminal Professional can now retrieve prospectuses for a wide range of funds from the funds' respective issuers in the German, Austrian, Italian and Swiss markets.

The fund prospectuses are available as printable PDF files and can be accessed quickly and conveniently via PrimeTerminal for use with advisory and sales conversations with customers. This new service can enhance bank employees' efficiency, since they will no longer need to spend time contacting multiple sources to retrieve and organise fund prospectuses.

Interactive Data has plans to further expand the range of fund information offered by PrimeTerminal Professional Edition in the future. These plans include enhancing the terminal to include fund information for Asian markets and additional information on US funds.

"Asset managers and financial advisors need to be able to access adequate fund information in order to assist their customers," said Carsten Dirks, managing director, Interactive Data Managed Solutions AG. "Our enhanced PrimeTerminal Professional Edition can now assist with providing quick access to this information from a single source."

About PrimeTerminal Professional Edition

PrimeTerminal Professional Edition is a customisable financial market terminal from Interactive Data. It can be tailored to the respective investment, advisory and sales processes of users in the private banking and asset management sectors. Data permissioning and cost allocation on a per user basis are designed to facilitate flexible and focused utilisation of the terminal. The PrimeTerminal user can access real-time

quotes, historical and master data, risk figures, performance indicators, company data, annual reports and analyst appraisals. Technical and financial mathematical analytics for various asset classes supplement the information. PrimeTerminal can interface with the users' internal data, such as research results, as well as content management and customer relationship management systems. Significant emphasis has been placed on making the PrimeTerminal user interface intuitive and easy to use. PrimeTerminal is currently deployed in 14 countries around the world.
