

INTERACTIVE DATA ENHANCES PRIMETERMINAL PROFESSIONAL EDITION FOR WEALTH MANAGERS

Now features European fund database from Morningstar, plus new analytics tools

FRANKFURT, Germany – 28 April, 2009 – Interactive Data Corporation (NYSE: IDC), a leading provider of financial market data, analytics and related solutions, today announced that its Managed Solutions business has integrated the European fund database from Morningstar, Inc. into its financial market terminal, PrimeTerminalSM Professional Edition. The new optional data package is primarily designed for investment advisors and asset managers in the wealth management segment to help enable quick fund analyses and a more efficient advisory process.

Morningstar's fund database provides comprehensive information on some 60,000 investment funds registered across Europe, including approximately 20,000 investment funds registered in Germany. The information includes daily prices, key figures such as Sharpe ratio, alpha and beta, as well as ISIN, fund currency, volume, and Morningstar ratings. Users can access information relating to the investment structure of the individual funds, broken down by country, sector or currency. Information on US and Asian markets may be available as optional add-on packages.

In addition, PrimeTerminal now offers a filter to help search for specific listed funds and Exchange Traded Funds (ETFs) and the Risk Return Map fund analytics tool, which is designed to help users compare the risks and volatilities of funds based on different timeframes and fund categories.

"This significant extension of our fund data offering to include Morningstar data, combined with the new and enhanced search and analytics functions, can help investment advisors – particularly those in the wealth management segment – to increase the efficiency of their daily workflow processes," said Carsten Dirks, managing director of Interactive Data Managed Solutions.

PrimeTerminal Professional Edition is a customisable, easy-to-use financial market terminal that can be tailored to the investment, advisory and sales processes of users in the private banking and asset management sectors. PrimeTerminal provides access to real-time quotes, historical and master data, risk figures, performance indicators, company data, annual reports and analyst appraisals. It can also interface with the users' internal data, content management and customer relationship management systems.

About Interactive Data Corporation

Interactive Data Corporation (NYSE: IDC) is a leading global provider of financial market data, analytics and related solutions to financial institutions, active traders and individual investors. The Company's businesses supply real-time market data, time-sensitive pricing, evaluations and reference data for millions of securities traded around the world, including hard-to-value instruments. Many of the world's best-known financial service and software companies subscribe to the Company's services in support of their trading, analysis, portfolio management and valuation activities. Interactive Data, headquartered in Bedford, Mass., has approximately 2,400 employees in offices located throughout North America, Europe, Asia and Australia. Pearson plc (NYSE: PSO; LSE: PSON), an international media company, whose businesses include the Financial Times Group, Pearson Education, and the Penguin Group, is Interactive Data Corporation's majority stockholder.

Interactive Data's Managed Solutions business is a leading provider and operator of customised financial information systems. The group builds and manages Web-based financial market data portals and terminals for a range of organisations worldwide, from retail and investment banks to asset managers, online brokers, stock exchanges and media portals. By aggregating a broad set of financial data and client-proprietary content and offering visually stunning features such as charts, sophisticated search functions, decision-support tools and analytics, these intuitive applications can help customers optimise their business processes and realise efficiencies. This group is managed as part of the Interactive Data's Real-Time Services business, which provides a comprehensive suite of offerings that includes PlusFeedSM, a consolidated, low-latency digital datafeed.
