Developer Solutions

IS.Teledata Certifies Developers And Project Managers

Developing Market Data Information Systems On IS.MarketDataGateway

Frankfurt, June 12, 2006 – IS.Teledata offers training and certifications for developers and project managers who want to develop market data information systems on IS.MarketDataGateway, the market data platform of IS.Teledata. Courses are available for programmers and project managers from IT departments of financial service providers or from software houses developing applications for the financial services industry. Most of the courses require programming skills in Java, .NET or PHP. They provide information on how to use the necessary interfaces and development tools to conceptualize, develop and manage complex applications on the market data platform of IS.Teledata, a managed solutions provider for customizable financial market information systems. The training catalogue providing further information on courses is available at www.is-teledata.com/en/produkte_development.html.

The courses and certifications complement the product IS.Developer Solutions. A range of IS.Developer Solutions is available, consisting of software developer kits for Java, .NET and PHP interfaces based on IS.MarketDataGateway. The platform harmonizes up-to-date market data from various sources and models asset classes such as shares, funds, warrants, certificates, options, futures and bonds. It represents these financial instruments using a consistent data model and integrates high-capacity analysis and search features. Market data is available delayed or in real-time. The platform offers a comprehensive permissioning solution to manage individual user access rights. The core of the IS.MarketDataGateway is the Object Server, which delivers data to customized solutions via Java, XML, .NET and PHP interfaces. The IS.MarketDataGateway is one of the most comprehensive market databases in Europe.
