

## PRESS RELEASE

### IS.Teledata AG Opens New Office in Spain

**Madrid, June 3rd, 2004** – IS.Teledata Iberia, S.L. has found a new office in Madrid. The rental agreement was signed a few days ago. The subsidiary will start to move to the new quarters in two to three weeks.

The new address is: **IS.Teledata Iberia, S.L.**  
**C/ María de Molina 37 bis 4ª planta**  
**28006 Madrid**  
**España**

The new office will enhance IS.Teledata's customer service and enforce its expansion in the Iberian market. "Expanding our business activities to the Spanish capital follows logically from our successful sales partnership with Standard & Poor's in Spain and Portugal," says Stephan Wolf, spokesman of the executive board of IS.Teledata AG.

Standard & Poor's and IS.Teledata AG have joined forces in early 2001 to supply financial service providers and media corporations on the Iberian region with market data, financial information systems and IT services. In the meantime, the cooperation has gathered a healthy portfolio of renowned major banks and online brokers. A round dozen customers of Standard & Poor's have since opted for solutions "implemented and powered by IS.Teledata AG".

By opening an office in Madrid's downtown district, IS.Teledata Iberia, S.L. underscores its commitment to be close to its customers. Starting in June, account managers, project managers and software developers will work together with the sales team of Standard & Poor's in close proximity to the peninsula's major banks. The organisation thus takes into account the increasing workload in the Spanish business as well as the growing demands of business customers for individual service, minimum reaction times and fast communication.

"Over the last three years, the Spanish market has rapidly gained significance for IS.Teledata AG. We are committed to generating half of the corporate turnover

outside of Germany. And in our growth strategy, the Spanish market plays a pivotal role," explains Wolf.

## **IS.Teledata AG**

IS.Teledata AG is Europe's largest provider of internet-based financial market information systems. The company arises from the merger of IS Innovative Software AG and OnVista Technologies GmbH. The corporation supports financial service providers with solutions and market data for professionals and customers. IS.Teledata provides a full range of products and services, from terminals and solutions for financial advisors and asset managers, websites and portals to powerful backend technologies for the distribution of financial market data. More than 260 employees in seven European countries are dedicated to the development and operations of professional solutions. In close cooperation, IS.Teledata helps its business customers to achieve their strategic goals by leveraging their strengths and implementing their visions. Business customers benefit from an international partner network in which technology partners, content providers and research institutions join hands with IS.Teledata to increase efficiency in today's financial industry.
